

AI Code Reviewer Report

File: length.py

Language: Python

Score: 80

Bugs Found: 1

Suggestions: 2

AI Review

The code can be improved by using the built-in `len()` function to get the length of the tuple

Original Code

```
t = (10,20,30,40)

count = 0

for i in t:
    count += 1

print("Length:", count)
```

AI Corrected Code

```
t = (10,20,30,40)
print('Length:', len(t))
```
